

about the clinic...

One of our goals each year as a staff is to try to learn and observe ways to improve our program. We feel that by hosting a clinic we can bring in the top coaches in the area to share their ideas on coaching softball to other coaches. If one coach can go away saying that he learned something that can help his program, then the clinic was a success.

In our clinic, we want to cover as many aspects of the game and let the coaches share their thoughts of how to teach these skills and also share their favorite drills in doing so. We feel that the more drills you can do to improve your player's skills, the more effective practices will be.

We hope you enjoy the day in Prosper and hope you learn a lot about softball. At the end of the day we will have an evaluation form so you can let us know how we can improve our clinic. If you have any questions for the coaches, please see them between sessions and find out your answers. We look forward to seeing you in January.
